PROFESSIONAL SUMMARY

Digital Growth Marketer and Senior Search Specialist with 7+ years of experience helping businesses improve online visibility, generate qualified leads, and build scalable customer acquisition systems. I specialize in the full search stack — SEO, AEO (Answer Engine Optimization), and GEO (Generative Engine Optimization) — combining traditional algorithmic rankings with AI-powered discovery across ChatGPT, Perplexity, Gemini, and Google AI Overviews.

I don't just run campaigns. I build digital growth systems — frameworks that combine SEO, paid advertising, content strategy, social media, and conversion optimization to solve real business growth problems. My approach blends creativity, data, technology, and customer psychology to turn search visibility into measurable revenue outcomes.

SEO · AEO · GEO — The Modern Search Stack

SEO helps brands rank on Page 1. AEO helps brands answer — capturing featured snippets, PAA boxes, and voice search results. GEO helps brands get discovered inside AI-generated experiences. I operate across all three simultaneously, making brands visible wherever their customers are searching in 2025 and beyond.
